$$\int \cos x \left(\frac{1}{(1 - \sin x)(1 + \sin x)} \right) dx$$

Rendered:

$$\int \cos x \left(\frac{1}{(1 - \sin x)(1 + \sin x)} \right) dx$$

Packages:

☐ [amsmath](#)
☐ [amssymb](#)

Description

Submit

Best try

$$\int \cos x \left(\frac{1}{(1 - \sin x)(1 + \sin x)} \right) dx$$

I want to display the integral of the function
 $f(x,y) = x^2 + y^2$...

My best try has issue XY...

The hypotheses will be adapted to the user. The adaption will include formula he already entered, but maybe also adaption to the field these formula seem to belong to.

$$\int \cos x \left(\frac{1}{(1 - \sin x)(1 + \sin x)} \right) dx$$

Alternatives:

$$\int \cos x \left(\frac{1}{(1 - \sin x)(1 + \sin x)} \right) dx$$

[Train](#)[No valid result](#)

When the user clicks on this, he gets informed that he can (interactively) try to get the desired results by adjusting the formula on the left side. If he can't manage to get the desired result, he can create a "user challenge".

$$\int \cos x \left(\frac{1}{(1 - \sin x)(1 + \sin x)} \right) dx$$

Q

Current selection / best hypothesis gets highlighted

$$\int \cos x \left(\frac{1}{(1 - \sin x)(1 + \sin x)} \right) dx$$

[Alternatives:](#)[Login](#)

$$\int \cos x \left(\frac{1}{(1 - \sin x)(1 + \sin x)} \right) dx$$

[Train](#)

The user can input text here. All terms that begin with a backslash \ have to be already in the database. If there is something new, the user will get redirected to symbol recognition.

$$\int \cos x \left(\frac{1}{(1 - \sin x)(1 + \sin x)} \right) dx$$

Current hypothesis displayed as LaTeX for copy / paste. It can also be edited here directly.

Question is up there

Comments

Do you really want XY or rather Z? user123

It is unusual to write X over AB. Most people rather write C. mario21

Comments should allow clarification if it is not clear what is written / wanted or if the way the formula is written is unusual.

Flags allow users to inform moderators of misuse.

[Add new answer](#)

$$\int \cos x \left(\frac{1}{(1 - \sin x)(1 + \sin x)} \right) dx$$

mario21

Voting helps to determine which answer is better. Users need to have completed some challenges first, before they can vote.
